

ENERGYONE

TRADING

Energy One Trading is a fully integrated energy risk management solution, built for the local energy market by recognised experts.

Not so much a product as a solution platform, **Energy One** is a modular system for wholesale energy traders, retailers and generators.

The system offers:

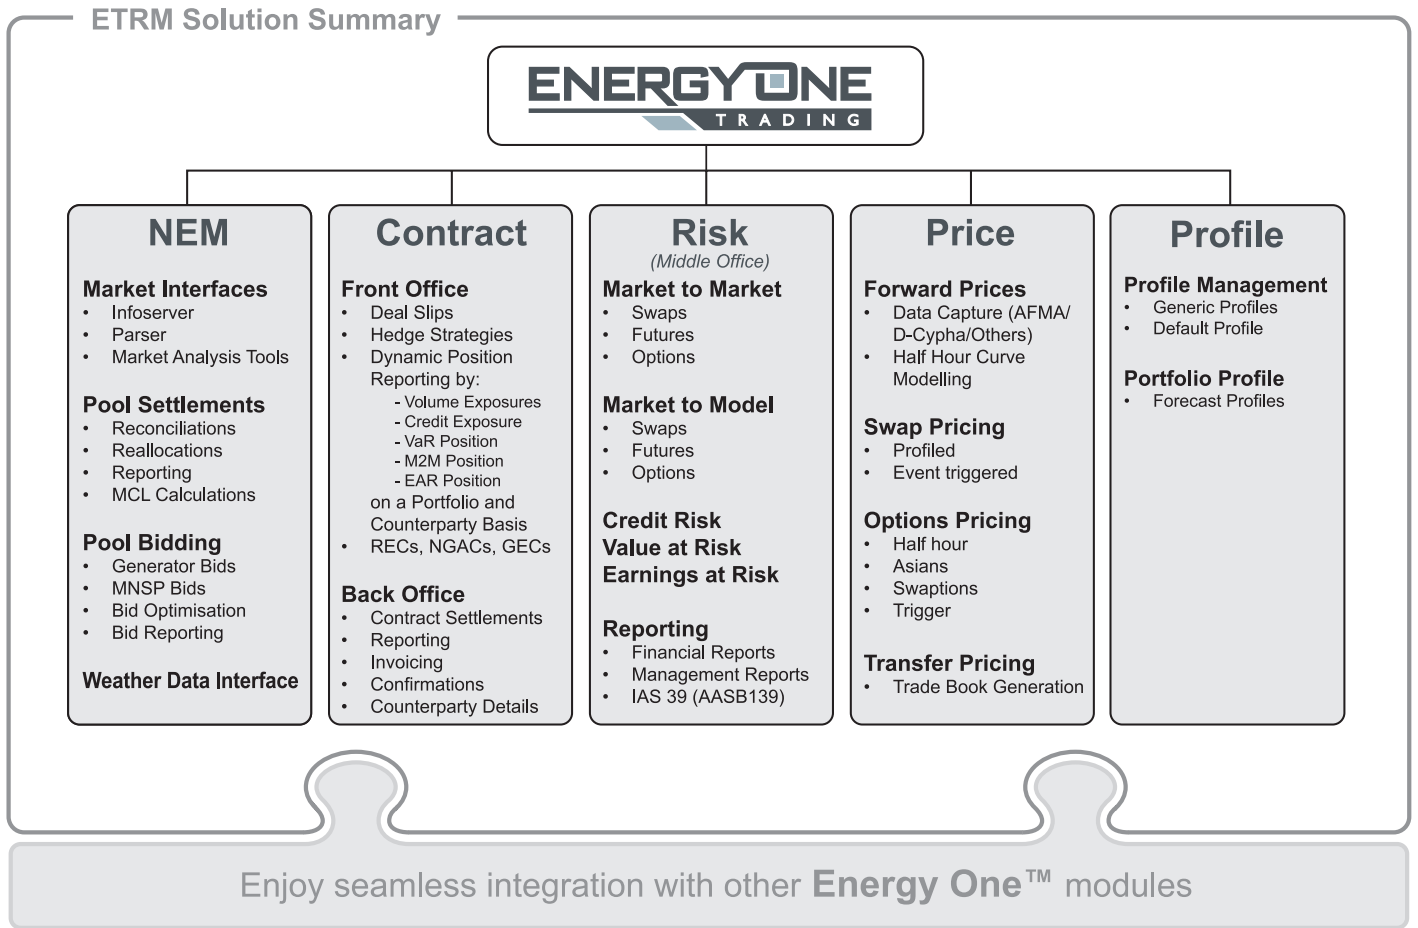

- A clear and concise physical market data interface
- Analytical tools for pool bidding and hedging purposes
- Deal capture for a wide variety of financial, derivative and commodity instruments (incl. environmental/emissions)
- High levels of front, middle and back office functionality
- Is hedge accounting compliant

Energy One is flexible enough to allow clients to tailor any preferred methodologies and configurations.

For more information on **Trading** products or to organise a demonstration, please call us on 1300 137 522 or visit www.energyone.com.au.

The key modules comprising **Energy One Trading** are:

We offer a number of different deployment options suiting large and small scale installations:
